The information is that three men were on a crane working to remove a cylinder. The structure crashed and knocked over the platform where the workers were.

One of the outsourced employees who worked on the operation managed to hold on to a cable and did not need assistance. The other fell and hit the structure during the fall, was rescued and sent to the Hospital and Maternity Nossa Senhora da Graça.

The third fell straight from a height of 15 meters and although he had no vital signs already in place he was attended to in an attempt to resuscitate, but was soon declared dead.

In a note, the TESC (Santa Catarina Port Terminal) lamented the death of the employee. According to the terminal, they provided services to a company specialized in the disassembly of large equipment.

TESC also informed that it is providing all support to families and authorities, in order to identify the causes of the accident.

NOTA DE ESCLARECIMENTO

É com pesar que o TESC informa a ocorrência, no final desta tarde, de um acidente ocorrido em seu terminal que resultou na morte de um trabalhador e lesões em outro. Ambos prestavam serviços a uma empresa especializada na desmontagem de equipamentos de grande porte. No caso, se tratava da desmontagem de um MHC vendido recentemente.

O TESC está apoiando todas as autoridades e a empresa responsável para elucidar os fatos e prestar todo apoio às vítimas e seus familiares.
