

Coatzacoalcos API, sets its position on the accident where a worker died at its facilities

Coatzacoalcos, Ver. March 1, 2021

This morning, Mr. Gerardo Velázquez García, a worker of MAPI Servicios del Istmo, SA de CV, for the assignee company CEMEX, SA de CV, located within the Coatzacoalcos Port Area, carried out maneuvers in the trailer parking lot and in doing so layed down a CEMEX full flat unit, loaded with 26 tons of cement packed in pallets.

While carrying out the activity, it is presumed that the unit made an unplanned movement with the worker on board, who was on the canvas that he was preparing, being entangled by the wheel pulling it with everything and the worker causing fatal injuries. The above, in accordance with the information collected insitum.

The Comprehensive Port Administration of Coatzacoalcos, SA de CV, and its Port Community, lament with deep sadness the loss. In turn, it extends its condolences to family and friends, wishing them prompt resignation.

At the time of this communication, it is unknown with certainty how the events occurred, since the transferee company and the corresponding authorities are carrying out the necessary proceedings.
