Ortona, accident at work at the port: a worker died

ORTONA - The man who lost his life in the early afternoon while working at the port of Ortona is 59 years old.

It seems, from the first reconstructions, that the Kosovar worker was crushed by a metal rack while he was inside a container.

Relief services arrived immediately and proved to be completely in vain. Access to the shore pier has been closed for the moment. The situation is being updated.
