

An emergency situation occurred in the port of Alexandria during the unloading of equipment for the El-Dabaa NPP under construction, an employee of an Egyptian contractor was killed, RBC reports with reference to the Atomstroyexport press service.

The company confirmed that part of the cargo for the station was damaged. A commission has been set up to assess the consequences with the participation of representatives of the plant, the general contractor and the Egyptian customer.

"At the moment, it is premature to draw final conclusions about the nature of the damage and the technical causes of the incident."

It is indicated that the incident will not affect the construction schedule of the nuclear power plant.
